38.4 Thymectomy Data Fields.....	174

MDS (MG) App Content Map & Legend

1. PATIENT PROFILE – Patient Identification

1.1 Description

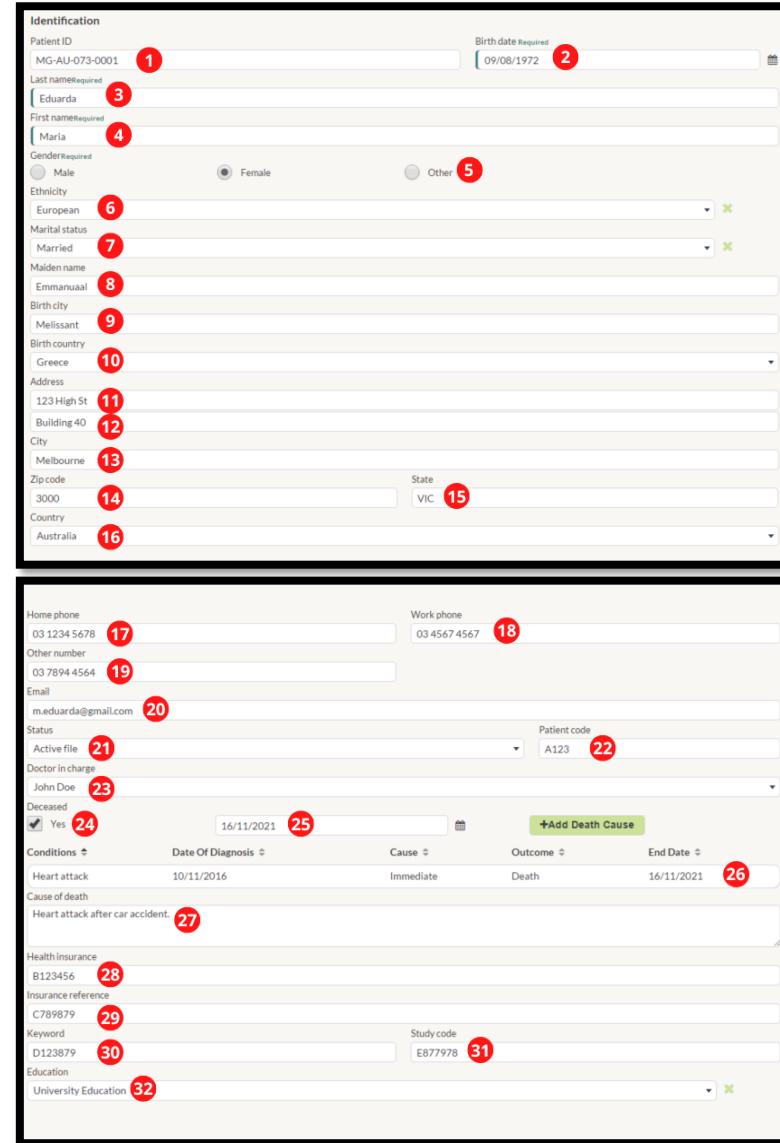

The Identification form captures basic demographic details, for example the Age and Sex and demographic details of the patient.

1.2 Rules and Constraints

- The minimum dataset consists of Last Name, First Name, Gender and Date of Birth.
- Patient cannot be saved unless mandatory fields are populated.
- Patient cannot be saved if there is another patient with the same identical minimum dataset.

1.3 Functions

- Add a patient – You can enter basic information about the patient, once saved, the patient now exists in MDS.
- Edit a patient – You can edit data about the patient.

1.4 Patient Identification Data Fields

Ref	Field	Type	Len	Data Format	Nullable	Validation/check	Allowed Values	Sent to Registry	Comments
1.01	Patient ID [Patient.GlobalCode]	String [nvarchar]	100	MG-CountryCode- CentreCode- PatientNumber, e.g. MG-XX-0000-0000	Mandatory			Y	Read only. Unique, the ID for the patient. Patient Number is determined by current highest number + 1
1.02	Birth Date [Patient.BirthDate]	Date [datetime]		dd/mm/yyyy	Mandatory	Required Duplicate Check	Filtered Today less 100 years to Today	Y	Day set to 1 (Month precision) when sent to Registry
1.03	Last Name [Patient.LastName]	String [nvarchar]	50		Mandatory	Required Duplicate Check Length		N	
1.04	First name [Patient.FirstName]	String [nvarchar]	50		Mandatory	Required Duplicate Check Length		N	
1.05	Gender [Patient.Gender]	Radio [int]			Mandatory	Required Duplicate Check	Female [1]; Male [0], Other [2]	Y	Biological sex of patient
1.06	Ethnicity [Patient.EthnicOriginId]	Dropdown [uniqueidentifier]			Yes		Lookup values from Table EthnicOrigin African; Jewish; Middle-eastern; Admixed; Other; Indigenous; Asian; European; Hispanic; Inuit; Semite	Y	Ethnic origin
1.07	Marital status [Patient.MaritalStatusId]	Dropdown [uniqueidentifier]			Yes		Lookup values from Table MaritalStatus Married; De Facto; Separated; Divorced; Widowed; Single (never married)	N	
1.08	Maiden Name [Patient.MaidenName]	String [nvarchar]	50		Yes	Length Available where Gender = Female		N	
1.09	Birth City [Patient.BirthCity]	String [nvarchar]	20		Yes	Length		Y	Birth city of patient

Ref	Field	Type	Len	Data Format	Nullable	Validation/check	Allowed Values	Sent to Registry	Comments
1.10	Birth Country [Patient.BirthCountryId]	Dropdown [uniqueidentifier]			Yes		Lookup Values from table Country Afghanistan; Albania; Algeria; Andorra; Angola; Argentina; Armenia; Australia; Austria; Azerbaijan; Bahamas; Bahrain; Bangladesh; Barbados; Belarus; Belgium; Belize; Benin; Bermuda; Bhutan; Bolivia; Bosnia And Herzegovina; Botswana; Brazil; Brunei Darussalam; Bulgarie; Burkina Faso; Burundi; Cambodia; Cameroon; Canada; Cape Verde; Central African Republic; Chad; Chile; China; Colombia; Congo; Costa Rica; Cote D'Ivoire; Croatia; Cuba; Cyprus; Czech Republic; Denmark; Djibouti; Dominica; Dominican Republic; East Timor; Ecuador; Egypt; El Salvador; Equatorial Guinea; Eritrea; Estonia; Ethiopia; Finland; France; Gabon; Gambia; Georgia; Germany; Ghana; Gibraltar; Greece; Greenland; Grenada; Guadeloupe; Guatemala; Guinea; Guinea-Bissau; Guyana; Haiti; Honduras; Hong Kong; Hungary; Iceland; India; Indonesia; Iran; Iraq; Ireland; Israel; Italy; Jamaica; Japan; Jordan; Kazakhstan; Kenya; Kuwait; Kyrgyzstan; Laos; Latvia; Lebanon; Lesotho; Liberia; Libya; Liechtenstein; Lithuania; Luxembourg; Macedonia; Madagascar; Malawi; Malaysia; Maldives; Mali; Malta; Mauritania; Mauritius; Mexico; Moldova; Monaco; Mongolia; Morocco; Mozambique; Namibia; Nepal; Netherlands; New Caledonia; New Zealand; Nicaragua; Niger; Nigeria; North Korea; Norway; Oman; Pakistan; Palestine; Panama;	Y	Birth country

Ref	Field	Type	Len	Data Format	Nullable	Validation/check	Allowed Values	Sent to Registry	Comments
							Paraguay; Peru; Philippines; Poland; Portugal; Puerto Rico; Qatar; Romania; Russian Federation; Rwanda; Samoa; San Marino; Saudi Arabia; Senegal; Serbia; Seychelles; Sierra Leone; Singapore; Slovakia; Slovenia; Somalia; South Africa; South Korea; Spain; Sri Lanka; Sudan; Suriname; Swaziland; Sweden; Switzerland; Syria; "Taiwan; Republic Of China"; Tajikistan; Tanzania; Thailand; Togo; Tonga; Tunisia; Turkey; Turkmenistan; Uganda; Ukrainian Ssr; United Arab Emirates; United Kingdom; United States; Uruguay; Uzbekistan; Venezuela; Vietnam; Western Sahara; Yemen; Zaire; Zambia; Zimbabwe		
1.11, 1.12	Address [Patient.Address_AddressLine1, Patient.Address_AddressLine2]	String [nvarchar]	50		Yes	Length		N	
1.13	City [Patient.Address_City]	String [nvarchar]	50		Yes	Length		N	
1.14	Zip Code [Patient.Address_ZipCode]	String [nvarchar]	10		Yes	Length		N	
1.15	State [Patient.Address_State]	String [nvarchar]	20		Yes	Length		N	
1.16	Country [Patient.AddressCountryId]	Dropdown [uniqueidentifier]			Yes		Lookup Values from table Country Afghanistan; Albania; Algeria; Andorra; Angola; Argentina; Armenia; Australia; Austria; Azerbaijan; Bahamas; Bahrain; Bangladesh; Barbados; Belarus; Belgium; Belize; Benin; Bermuda; Bhutan; Bolivia; Bosnia And Herzegovina; Botswana;	Y	Country of residence

Ref	Field	Type	Len	Data Format	Nullable	Validation/check	Allowed Values	Sent to Registry	Comments

1.18	Work Phone [Patient.WorkPhone]	String [nvarchar]	50		Yes	Length max 20		N	
1.19	Other Number [Patient.OtherNumber]	String [nvarchar]	50		Yes	Length max 20		N	
1.20	Email [Patient.Email]	String [nvarchar]	100		Yes	Validity Length		N	
1.21	Status [Patient.Status]	Dropdown [int]			Yes		Active File [2]; Inactive File [1]	Y	Defaults to Active File
1.22	Patient Code [Patient.PatientCode]	String [nvarchar]	50		Yes	Length		N	
1.23	Doctor in charge [Patient.DoctorInCharge]	Dropdown [uniqueidentifier]			Yes		Lookup Values from table User (Centre specific)	N	
1.24	Deceased [Patient.IsDeceased]	Checkbox [bit]			No		No [0]; Yes [1]	Y	
1.25	Deceased Date [Patient.DateOfDeath]	Date [datetime]		dd/mm/yyyy	Yes	Only available if Deceased = Yes Required if Deceased = Yes	Filtered ≥ Date of Birth and ≤ Today	Y	

Ref	Field	Type	Len	Data Format	Nullable	Validation/check	Allowed Values	Sent to Registry	Comments
1.26	Death Related Cause [FK__MedicalEv__Patie__09FE775D, Relationship 1 to Many, Patient.Id to MedicalEvent.PatientId]	Sub-Report [Relationship]			Yes				Captured in Medical Events, aggregated in this view.
1.27	Cause of Death [Patient.CauseOfDeath]	String [nvarchar]	50		Yes	Only available if Deceased = Yes Length		Y	
1.28	Health Insurance [Patient.HealthInsurance]	String [nvarchar]	20		Yes	Length		N	
1.29	Insurance Reference [Patient.InsuranceReference]	String [nvarchar]	20		Yes	Length		N	
1.30	Keyword [Patient.Keyword]	String [nvarchar]	50		Yes	Length		N	
1.31	Study code [Patient.StudyCode]	String [nvarchar]	20		Yes	Length		N	
1.32	Education [Patient.Education]	Dropdown [nvarchar]	20		Yes		Lookup Values from table Education Primary school; Secondary school; University Education; Technical/ Trade College	Y	Education level
	[Patient.CreatedByUserId]	Hidden [uniqueidentifier]			No			Y	
	[Patient.CreatedUtcDate]	Hidden [datetime]			No			Y	
	[Patient.GlobalId]	Hidden [int]			Yes			Y	Unique patient id that is the used in the calculation of the Global Code. Used to track what the next id is for creating the Global Code (MSBase Patient ID).

Ref	Field	Type	Len	Data Format	Nullable	Validation/check	Allowed Values	Sent to Registry	Comments
	[Patient.Id]	Hidden [uniqueidentifier]			No			Y	Global unique id and assigned on creation
	[Patient.iMedFingerprint]	Hidden [nvarchar]	50		Yes			Y	Populated when patient data is imported from iMed. Global unique iMed Patient ID
	[Patient.IsActive]	Hidden [bit]			No			Y	No longer used.
	[Patient.IsComplete]	Hidden [bit]			Yes			N	Calculated by – must have 1 visit in past 12 months with MGC and Modified Rankin scores. Must have a diagnosis.
	[Patient.IsDeleted]	Hidden [bit]			No			Y	Set when user deletes the record from Manage All patients.
	[Patient.IsEnrolled]	Hidden [bit]			No			N	Set to 1 when enrolled from Manage All Patients or Patient Details
	[Patient.ModifiedByUserId]	Hidden [uniqueidentifier]			No			Y	
	[Patient.ModifiedUtcDate]	Hidden [datetime]			No			Y	
	[Patient.RegistryId]	Hidden [uniqueidentifier]			Yes			N	Patient ID on registry, set when a patient is synced to registry.
	[Patient.RowVersion]	Hidden [bigint]			No			Y	System managed value to prevent conflicting edits to a record.
	[FK_Patient_EthnicOriginId, Relationship 1 to Many,	Hidden [Relationship]							

Ref	Field	Type	Len	Data Format	Nullable	Validation/check	Allowed Values	Sent to Registry	Comments

2. PATIENT PROFILE – Medical History

Entry in the Clinic

Date Required ①

Referred by ②

History of other autoimmune diseases
 Unknown Yes No ③

Diseases and Medical conditions ④

Conditions	Date Of Diagnosis	Treatment Modality	Outcome	End Date
Heart attack	10/11/2016		Death	16/11/2021

Family Disease History ⑤ Family MG History ? Yes No ⑥

MDS	Relationship	Name	MG	Medical Conditions
✓	Brother	Thomas May	✓	Myasthenia gravis (13/05/2004 - 14/11/2008) Skin cancer (28/08/1987 - 17/08/1995)

Remarks ⑦

Brother - Congenital MG

2.1 Description

The Medical History captures information about the patient's medical history and family medical history.

- medical history for patient.
 - Enter and Delete Medical Condition – You can add/edit Medical Event and Delete Medical Event.
- Enter and Delete Family History – You can add and remove family member disease history.

2.2 Rules and Constraints

- Medical History for family members does not need to be MS Related.

2.3 Functions

- Enter/Edit Data – You can add and modify diseases and medical conditions for patient and also access the family disease history (medical conditions) if applicable.

2.4 Medical History Data Fields

Ref	Field	Type	Len	Data Format	Nullable	Validation/check	Allowed Values	Sent to Registry	Comments
2.01	Date [PatientMedicalHistory.Date]	Date [datetime]		dd/mm/yyyy	No	Mandatory	Filtered ≥ Date of Birth and ≤ Today	Y	Defaults to <today> Clinic entry/First Seen
2.02	Referred by [PatientMedicalHistory.ReferredById]	Dropdown [uniqueidentifier]			Yes		Lookup values from Table CareProfessional (Centre specific)	N	
2.03	History of other autoimmune diseases [PatientMedicalHistory.HistoryOfOtherAutoimmuneDiseases]	Radio [bit]			Yes		Unknown[NULL]; Yes[1]; No[0]	Y	Measure in months
2.04	Diseases and Medical conditions [FK__MedicalEv__Patie__09FE775D, Relationship 1 to Many, Patient.Id to MedicalEvent.PatientId] [FK__Covid19Event__Id__69279377, Relationship 1 to 1, MedicalEvent.Id to Covid19Event.Id] [FK__FlexiFieldEv__Id__7CA47C3F, Relationship 1 to 1, MedicalEvent.Id to FlexiFieldEvent.Id] [FK__HerpesEvent__Id__7F80E8EA, Relationship 1 to 1, MedicalEvent.Id to HerpesEvent.Id] [FK__ImmunolInfect__Id__0169315C, Relationship 1 to 1, MedicalEvent.Id to ImmunolInfectionEvent.Id] [FK__MalignancyEv__Id__090A5324, Relationship 1 to 1, MedicalEvent.Id to MalignancyEvent.Id] [FK__NMSCEvent__Id__147C05D0, Relationship 1 to 1, MedicalEvent.Id to NMSCEvent.Id] [FK__OtherEvent__Id__1A34DF26, Relationship 1 to 1, MedicalEvent.Id to OtherEvent.Id] [FK__PregnancyEve__Id__320C68B7,	Sub-report [Relationships]			Yes				Captured in Medical Events, aggregated in this view

	[PatientMedicalHistory.ModifiedUtcDate]	Hidden [datetime]			No			Y	
	[PatientMedicalHistory.RowVersion]	Hidden [bigint]			No			Y	System managed value to prevent conflicting edits to a record.
	[FK_PatientMe_Referr_24B26D99, Relationship 1 to Many, CareProfessional.Id to PatientMedicalHistory.ReferredById]	Hidden [Relationship]							

Ref	Field	Type	Len	Data Format	Nullable	Validation/check	Allowed Values	Sent to Registry	Comments
	[FK_PatientMedic_Id_25A691D2, Relationship 1 to 1 Patient.Id to PatientMedicalHistory.Id]	Hidden [Relationship]							

3. PATIENT PROFILE - Medical History – Family History

3.1 Description

This Family History form is an important utility to capture familial medical conditions. A family member may already exist in MDS, in which case the family member may be selected from the drop-down list and their details will be pre-populated. However, in the likely scenario that the family member is not in MDS then this data may be entered manually.

This screen will only appear when initiated from the Medical History page.

3.2 Rules and Constraints

- Relationship type is a mandatory field.

3.3 Functions

- Enter Data – User enters disease and medical history for patient.
- Enter, Edit and Delete Medical Condition – User able to add Medical Event and Delete Medical Event.
- Enter and Delete Family History – User able to add and remove family member disease history.

Add a new family disease history

4. PATIENT PROFILE – Diagnosis

4.1 Description

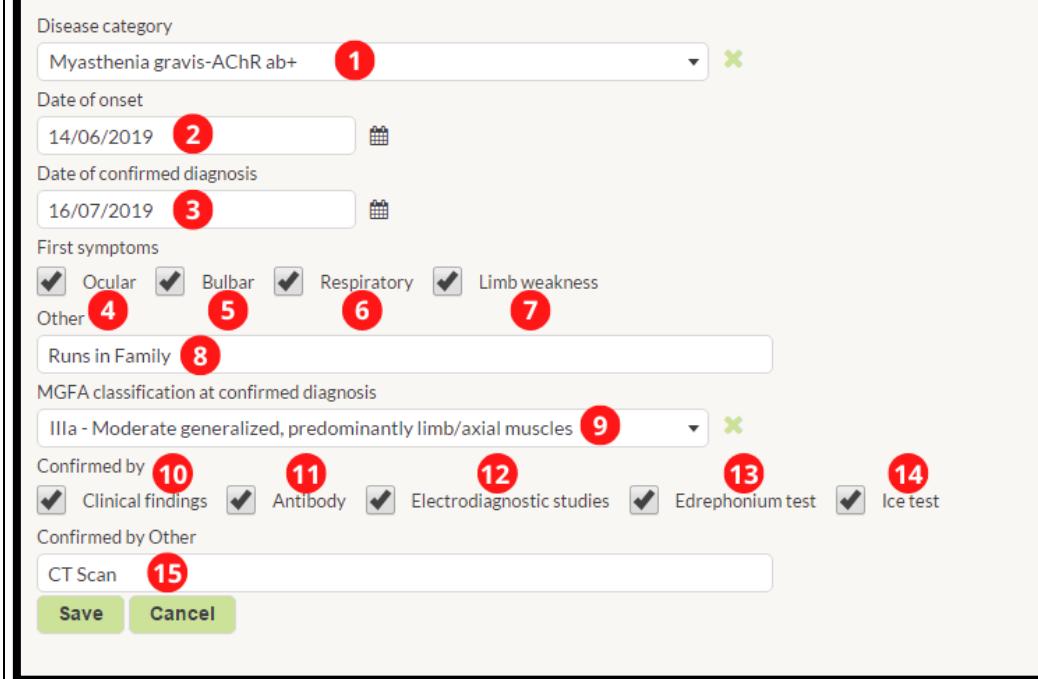

The diagnosis form allows the user to enter information about the MG diagnosis of the patient.

4.2 Rules and Constraints

- Date of confirmed diagnosis must occur after Date of onset

4.3 Functions

- Enter/edit Data – You can enter data about the patient's diagnosis.

Disease category
Myasthenia gravis-AChR ab+ ①

Date of onset
14/06/2019 ②

Date of confirmed diagnosis
16/07/2019 ③

First symptoms
Ocular ④, Bulbar ⑤, Respiratory ⑥, Limb weakness ⑦, Other ④, Runs in Family ⑧

MGFA classification at confirmed diagnosis
IIIa - Moderate generalized, predominantly limb/axial muscles ⑨

Confirmed by
Clinical findings ⑩, Antibody ⑪, Electodiagnostic studies ⑫, Edrophonium test ⑬, Ice test ⑭

Confirmed by Other
CT Scan ⑯

Save Cancel

5. PATIENT PROFILE - Flexifields

5.1 Description

Flexifields that have been created can be found in the Patient Profile Flexfield section. By default, the Centre Flexifields will be shown.

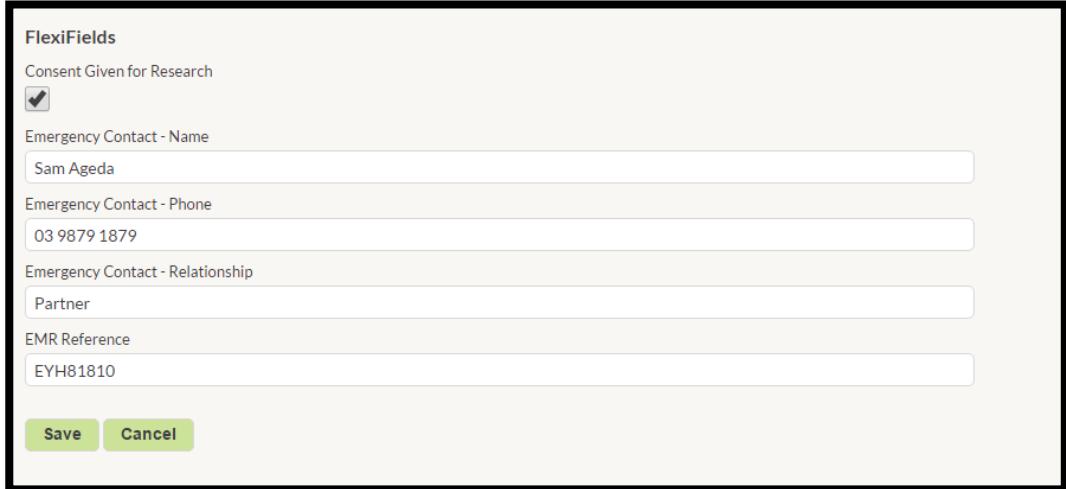

If the patient belongs to a sub-study where flexifields have been added, then they will also appear in this section as an additional tab. For further information refer to the User Guide.

5.2 Rules and Constraints

- Flexifields must be specified in the Preferences.
The types of flexifields that can be specified are:
 - Text
 - Numeric
 - Date
 - Text Area
 - Dropdown
 - Checkbox
 - Header

5.3 Functions

- Enter/Edit Data – You can enter data into Flexifields.

FlexiFields

5.4 Patient Flexfield Data Fields

Ref	Field	Type	Len	Data Format	Nullable	Validation/check	Allowed Values	Sent to Registry	Comments
	FlexiField Name [FlexiField.Name]	Field Label						N	
	FlexiField Value [PatientFlexiField.Value]	String [nvarchar]	1000		Yes		Allowed values will depend on the type of flexifield. Dropdown lists comes from [FlexiFieldOption.Value]	N	
	[PatientFlexiField.CreatedByUserId]	Hidden [uniqueidentifier]			No			N	
	[PatientFlexiField.CreatedUtcDate]	Hidden [datetime]			No			N	
	[PatientFlexiField.FieldId]	Hidden [uniqueidentifier]			No			N	
	[PatientFlexiField.Id]	Hidden [uniqueidentifier]			No			N	
	[PatientFlexiField.ModifiedByUserId]	Hidden [uniqueidentifier]			No			N	
	[PatientFlexiField.ModifiedUtcDate]	Hidden [datetime]			No			N	
	[PatientFlexiField.PatientId]	Hidden [uniqueidentifier]			No			N	
	[PatientFlexiField.RowVersion]	Hidden [bigint]			No			N	System managed value to prevent conflicting edits to a record.
	[FK__PatientFl__Patie__21D600EE, Relationship 1 to 1 Patient.Id to PatientFlexiField.PatientId]	Hidden [Relationship]							
	[FK__PatientFl__Field__20E1DCB5, Relationship many to many FlexiField.Id to PatientFlexiField.FieldId]	Hidden [Relationship]							

Notes:

- Table PatientFlexiField contains the value that is entered for flexifields from the Patient Profile Flexifields screen in MDS
- Table FlexiField contains the definition of the flexifields, i.e., Name and Data Type
- Table FlexiFieldOptions contains the values defined for flexifields where type is a dropdown

6. PATIENT PROFILE – Notes

6.1 Description

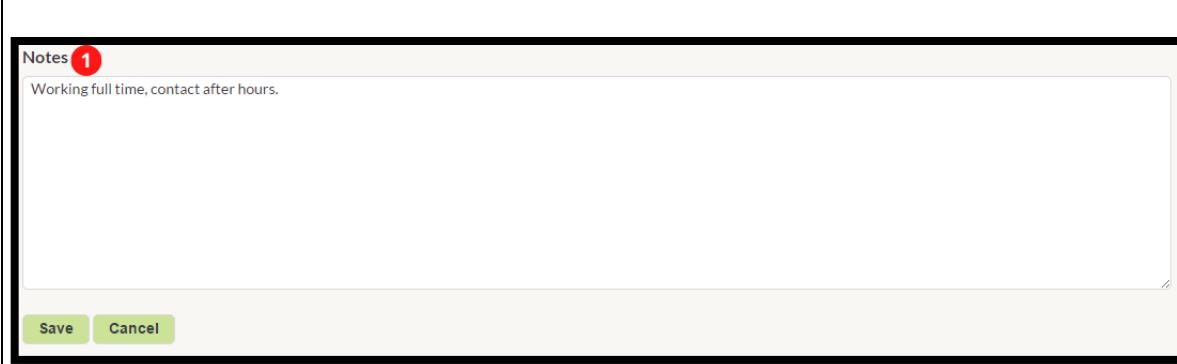

The Notes section allows the user to enter general notes about the patient, upload documents and provide links to WWW resources. **None of this data is sent to the MGBase Registry.**

6.2 Rules and Constraints

- Documents to be copied from origin directory to shared network location.

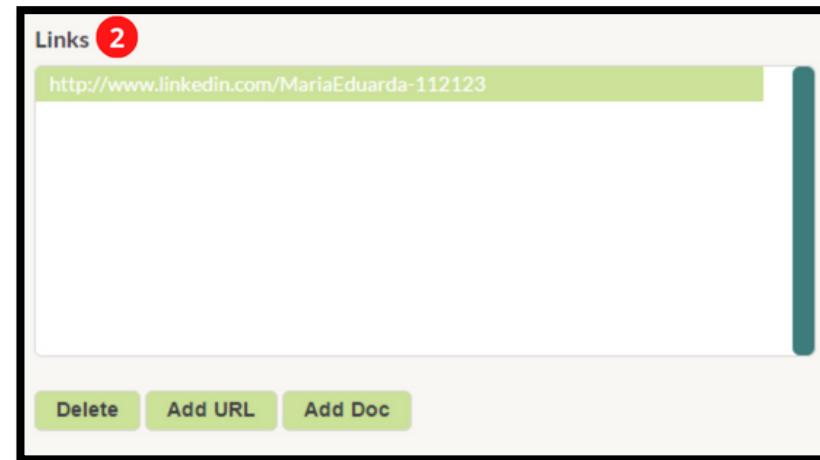

6.3 Functions

- Enter Data - User enters general notes about the patient.
- Add Link - User links to local document, this document is then copied to shared area so that other users have it available.
- Add URL - User links to WWW resources. The link is active, and no downloading of the site occurs.

Notes 1
Working full time, contact after hours.

7. VISITS – Basic Details

7.1 Description

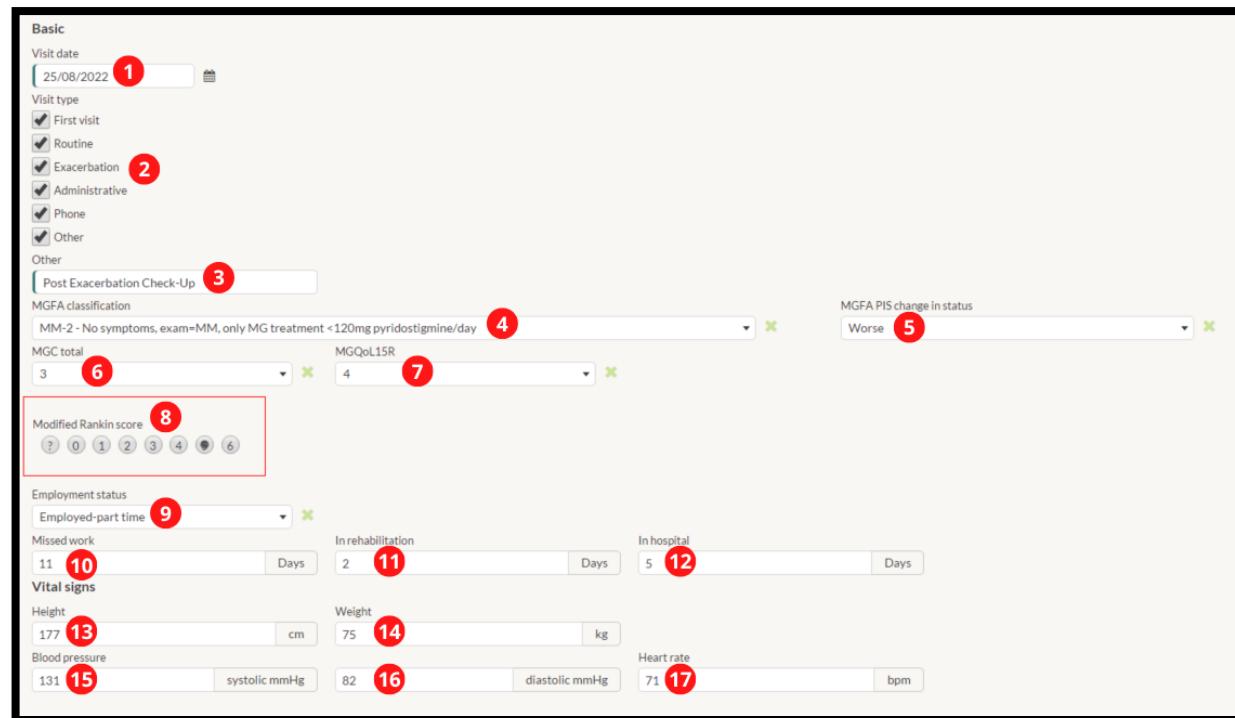

The Visits section captures the status of the patient on a specific date. A patient can have many Visits.

7.2 Rules and Constraints

- Visit date must be after date of birth, and prior to date of death. New Visit cannot be created if patient is marked as deceased.
- Visit Type is required
- MGC score is pulled through from MGC Tab (if score exists in that tab) but can be overwritten in the Basic tab by the clinician.
- **MGC and MRS** (Modified Rankin Score) are part of the minimum dataset and should be captured at bi-annual intervals at minimum.

7.3 Functions

- Create 1 or more visits
- Delete 1 or more visits
- Enter/edit data – You can enter/edit data about the visit

Basic

Visit date: 25/08/2022 1

Visit type:

- First visit
- Routine
- Exacerbation 2
- Administrative
- Phone
- Other

Other: Post Exacerbation Check-Up 3

MGFA classification: MM-2 - No symptoms, exam=MM, only MG treatment <120mg pyridostigmine/day 4

MG total: 3 6 4 7

MGQoL15R: 6 7

Modified Rankin score: 8 0 1 2 3 4 5 6

Employment status: Employed-part time 9

Missed work: 11 10 Days In rehabilitation: 2 11 Days In hospital: 5 12 Days

Vital signs:

Height: 177 13 cm	Weight: 75 14 kg
Blood pressure: 131 15 systolic mmHg	82 16 diastolic mmHg
Heart rate: 71 17 bpm

8. VISITS – MGC

8.1 Description

This tab presents the MGC (Myasthenia Gravis Composite scale)

8.2 Functions

- This tab can be used to select a value for each of the relevant symptoms or impairments.
- The total is calculated based on all the selected values.
- The MGC total automatically pulls through to the Basic Visit tab for that specific Visit but can be overwritten by the clinician.

MGC	
Ptosis	1 (1) Between 11 - 45 seconds x
Diplopia	2 (3) Between 1-10 seconds x
Eye Closure	3 (0) Mild weakness (can be forced open with effort) x
Talking	4 (4) Constant slurring or nasal but can be understood x
Chewing	5 (2) Fatigue with solid food x
Swallow	6 (5) Frequent trouble swallowing e.g. necessitating change in diet x
Breathing	7 (2) Shortness of breath with exertion x
Neck Weakness	8 (1) Mild weakness x
Shoulder Abduction	9 (2) Mild weakness x
Hip Flexion	10 (4) Moderate weakness (ie ~50% weak) x
TOTAL	11 24 x

8.3 MGC Data Fields

Note: the value in () is the score for that option and value in [] is the identifier stored in the database for that option.

Ref	Field	Type	Len	Data Format	Nullable	Validation/check	Allowed Values	Sent to Registry	Comments
8.01	Ptosis [PatientVisitMGC.PtosisScore]	Dropdown [int]			Yes		(0) Normal or >45 seconds[0]; (1) Between 11 - 45 seconds[1]; (2) Between 1-10 seconds[2]; (3) Immediate[3]	Y	
8.02	Diplopia [PatientVisitMGC.DiplopiaScore]	Dropdown [int]			Yes		(0) Normal or >45 seconds[0]; (1) Between 11 - 45 seconds[1]; (3) Between 1-10 seconds[2]; (4) Immediate [3]	Y	
8.03	Eye Closure [PatientVisitMGC.EyeClosureScore]	Dropdown [int]			Yes		(0) Normal[0]; (0) Mild weakness (can be forced open with effort)[1]; (1) Moderate weakness (can be forced open easily)[2]; (2) Severe weakness (unable to keep eyes closed)[3]	Y	
8.04	Talking [PatientVisitMGC.TalkingScore]	Dropdown [int]			Yes		(0) Normal[0]; (2) Intermittant slurring or nasal speech[1]; (4) Constant slurring or nasal but can be understood[2]; (6) Difficult to understand speech[3]	Y	
8.05	Chewing [PatientVisitMGC.ChewingScore]	Dropdown [int]			Yes		(0) Normal[0]; (2) Fatigue with solid food[1]; (4) Fatigue with soft food[2]; (6) Gastric tube[3]	Y	
8.06	Swallow [PatientVisitMGC.SwallowScore]	Dropdown [int]			Yes		(0) Normal[0]; (2) Rare episode of choking or trouble swallowing[1]; (5) Frequent trouble swallowing e.g.	Y	

Ref	Field	Type	Len	Data Format	Nullable	Validation/check	Allowed Values	Sent to Registry	Comments
							necessitating change in diet[2]; (6) Gastric tube[3]"		
8.07	Breathing [PatientVisitMGC.BreathingScore]	Dropdown [int]			Yes		(0) Normal[0]; (2) Shortness of breath with exertion[1] (4) Shortness of breath at rest[2]; (9) Ventilator dependence[3]	Y	
8.08	Neck Weakness [PatientVisitMGC.NeckWeaknessScore]	Dropdown [int]			Yes		(0) Normal[0]; (1) Mild weakness[1]; (3) Moderate weakness (ie ~50% weak)[2]; (4) Severe weakness[3]	Y	
8.09	Shoulder Abduction [PatientVisitMGC.ShoulderAbductionScore]	Dropdown [int]			Yes		(0) Normal[0]; (2) Mild weakness[1]; (4) Moderate weakness (ie ~50% weak)[2]; (4) Severe weakness[3]	Y	
8.10	Hip Flexion [PatientVisitMGC.HipFlexionScore]	Dropdown [int]			Yes		(0) Normal[0]; (2) Mild weakness[1]; (4) Moderate weakness (ie ~50% weak)[2]; (4) Severe weakness[3]	Y	
8.11	TOTAL [PatientVisitMGC.CalculatedScore]	Dropdown [int]			Yes		0 to 50	Y	Calculated but can be manually overridden.
	[PatientVisitMGC.CreatedById]	Hidden [uniqueidentifier]			No			Y	
	[PatientVisitMGC.CreatedUtcDate]	Hidden [datetime]			No			Y	
	[PatientVisitMGC.Id]	Hidden [uniqueidentifier]			No			Y	

Ref	Field	Type	Len	Data Format	Nullable	Validation/check	Allowed Values	Sent to Registry	Comments
	[PatientVisitMGC.ModifiedByUserId]	Hidden [uniqueidentifier]			No			Y	
	[PatientVisitMGC.ModifiedUtcDate]	Hidden [datetime]			No			Y	
	[PatientVisitMGC.RowVersion]	Hidden [bigint]			No			Y	System managed value to prevent conflicting edits to a record.
	[FK_PatientVisit_Id_7D63964E, Relationship 1 to 1, PatientVisit.Id to PatientVisitMGC.Id]	Hidden [Relationship]							

9. VISITS – MGII PROMS

9.1 Description

This tab presents the MGII PROMS (Myasthenia Gravis Impairment Index, Patient Reported Outcome Measures) tab with relevant questions and values which can be selected and filled.

9.2 Rules and Constraints

- The total is calculated based on all selected responses (values) from all the sections.
- MGII PROMS is not mandatory but if used, ideally should be completed at least annually.

9.3 Functions

- Each section can be completed separately (Eyes | Eating | Speaking and Breathing | Generalised Symptoms)
- Clinician is able to navigate between any of the sections in order to complete selected questions pertaining to the patient record.

MGII PROMS	
	Eyes Eating Speaking and Breathing Generalised Symptoms
Eyes	
Double vision	
Double vision during the day	
Have you experienced episodes of double vision? If yes, at what time do they occur (on average)?	
(1) Episodes only in the evenings	1
(2) After less than 1 hour, but not immediately	2
(3) Mild: It doesn't affect my daily activities	3
(4) Drooping starts in the afternoons	4
(5) After more than 1 hour	5
(6) It affects my vision, but no need to lift my eyelid	6
Double vision with activities	
Have you experienced double vision with activities such as reading, driving, watching TV or using a computer? If yes, how long does it take (on average) before the double vision occurs?	
Severity of double vision	
Have you experienced double vision? If yes, how severe has it been (at your worst)?	
Eyelids	
Eyelid drooping throughout the day	
Have you experienced dropping of your eyelid(s)? If yes, when does it occur (on average)?	
(1) After more than 1 hour	5
(2) Drooping starts in the afternoons	4
Eyelid drooping with activities	
Have you experienced dropping of your eyelid(s) with activities such as reading, driving, watching TV or using a computer? If yes, how long does it take (on average) before the drooping occurs?	
Severity of eyelid drooping	
Have you experienced dropping of your eyelids? If yes, how severe has it been (at your worst)?	
TOTAL	9
Eating	
Problems eating	
Difficulty swallowing	
Have you had difficulty swallowing? How difficult has it been?	
(4) Unable to swallow or using a feeding tube	7
(2) Difficulty chewing soft foods (e.g. hard boiled egg)	8
(1) Difficulty chewing at the end of the meal	9
Chewing different types of food	
Have you experienced chewing? How severe has it been (at your worst)?	
Chewing tiredness/fatigue	
At your worst, how long does it take to develop fatigue or tiredness in your jaw?	
TOTAL	23

Speaking and Breathing

Please answer regarding the past 2 weeks

Voice changes during the day
Have you experienced episodes of nasal, hoarse or weak voice? When do they occur (on average)?

Voice changes with prolonged conversation
How long can you talk (on average)? How severe has it been (at your worst)?

Severity of voice changes
At your worst, how severe have your voice changes been? (Nasal, hoarse, weak voice)

Speech clarity during day
Have you experienced difficulty pronouncing words or slurred speech? When does it occur on average?

Speech clarity with prolonged conversation
How long can you talk (on average), before developing slurred speech? (Normal conversation, with pauses for other speakers)

Severity of speech changes
At your worst, how severe have your speech changes been? (Slurring, difficulty pronouncing words)

Difficulty breathing
Have you experienced shortness of breath that is caused by myasthenia? (i.e. not caused by asthma, or other lung/heart disease) If yes, when has it occurred (at your worst)?

TOTAL 23

(1) Voice changes only in the evenings	10	
(1) Voice changes after more than 30 minutes	11	
(1) Mild changes: my voice is mostly clear	12	
(0) No episodes of slurred speech	13	
(1) Slurred speech after 30 minutes	14	
(0) No episodes of slurred speech	15	
(3) At rest or when lying on my back	16	

Generalised Symptoms

Please answer regarding the past 2 weeks

Overall physical tiredness
Have you experienced overall physical tiredness caused by myasthenia gravis? (i.e. not by sleeplessness, depression or other medical conditions)

Arm weakness severity
Have you experienced weakness in your arms? If yes, how severe has it been (at your worst)?

Arm weakness with prolonged use
Have you experienced weakness in your arms after prolonged use? When does it happen (on average)?

Leg weakness severity
Have you experienced weakness in your legs? If yes, how severe has it been (at your worst)?

Leg weakness with prolonged use
Have you experienced weakness in your legs after prolonged use? When does it happen (on average)?

Neck weakness
Have you experienced weakness in your neck? When does it happen (on average)?

TOTAL 28

(0) No physical tiredness	17	
(1) Mild weakness (e.g: difficulty lifting heavy objects)	18	
(0) No arm weakness	19	
(0) No leg weakness	20	
(2) Weakness when walking less than 10 blocks at my own pace	21	
(2) Weakness starting in the afternoons	22	

9.4 MGII PROMS Data Fields

Note: the value in () is the score for that option and value in [] is the identifier stored in the database for that option.

Ref	Field	Type	Len	Data Format	Nullable	Validation/check	Allowed Values	Sent to Registry	Comments

10. VISITS – MGQoL15R

10.1 Description

This tab presents a survey designed to assess aspects of life related to myasthenia gravis. There is appropriate correlation between the 15 item MG-QOL 15 and other MG-specific scales (MGC, MG-ADL, and MG-MMT). The MG-QOL 15 can be completed by the patient or administered by the physician or trained clinic personnel or study coordinator.

10.2 Rules and Constraints

- There are 15 items, however the total is calculated based on all selected / filled responses (values).
- MGQoL15R is not mandatory but if used, ideally should be completed at least annually.
- Once saved, the total is pulled through to the Visit Basic screen for the same date.

10.3 Functions

- Each question has a radio button selection making it easy to complete quickly.)

MGQoL15R

1. I am frustrated by my MG
2. I have trouble using my eyes
3. I have trouble eating because of my MG
4. I have limited my social activity because of my MG
5. My MG limits my ability to enjoy hobbies and fun activities
6. I have trouble meeting the needs of my family because of my MG
7. I have to make plans around my MG
8. My occupational skills and job status have been negatively affected by MG
9. I have difficulty speaking due to my MG
10. I have trouble driving due to MG
11. I am depressed about my MG
12. I have trouble walking due to MG
13. I have trouble getting around public places because of my MG
14. I feel overwhelmed by my MG
15. I have trouble performing my personal grooming needs

11. VISITS – MG-ADL

11.1 Description

This tab presents the Myasthenia Gravis – Activities of Daily Living Survey and profile. Quick to complete (<10 minutes)

11.2 Rules and Constraints

- There are 8 items, however the total is calculated based on all selected / filled responses (values).
- MG-ADL is not mandatory but if used, ideally should be completed at least annually.
- Total is auto-calculated and read-only on the MG-ADL Tab

11.3 Functions

Each question has a drop-down box making it easy to complete quickly.

MG-ADL	
Talking	(1) Intermittent slurring or nasal speech (2) Fatigue with soft food
Chewing	(2) Frequent choking necessitating changes in diet
Swallowing	(1) Shortness of breath with exertion (2) Rest periods needed
Breathing	(0) None (2) Daily, but not constant
Impairment of ability to brush teeth or comb hair	(1) Occurs, but not daily
Impairment of ability to arise from chair	
Double Vision	
Eyelid Droop	
TOTAL	11 9

11.3 MG-ADL Data Fields

Note: the value in () is the score for that option and value in [] is the identifier stored in the database for that option.

12. VISITS – QMG

12.1 Description

This tab presents the Quantitative Myasthenia Gravis score. The QMG score has several items that measure endurance or fatigability, taking into account the fluctuating nature of the disease.

12.2 Rules and Constraints

- There are 13 items, however the total is calculated based on all selected / filled responses (values).
- QMG is not mandatory but if used, ideally should be completed at least annually.

12.3 Functions

Each question has a dropdown value that can be selected making it easy to complete quickly.)

QMG	
Double vision- lateral gaze (sec)	(0) No diplopia in 60 seconds
Ptosis-upward gaze (sec)	(1) Ptosis between 11-59 seconds
Facial muscles (eye closure)	(0) Normal lid closure
Swallowing water (1/2 cup)	(2) Severe coughing
Speech following counting aloud from 1-50 (onset of dysarthria)	(1) Dysarthria at count between 30-49
Right arm outstretched-90 degrees, sitting (sec)	(0) Right arm outstretched for 240 seconds
Left arm outstretched- 90 degrees, sitting (sec)	(2) Left arm outstretched between 10-89 seconds
Forced vital capacity	(1) 65-79%
Right hand grip (kg)	(1) Male 15-44 kg, Female 10-29 kg
Left hand grip (kg)	(1) (1) Male 15-34 kg, Female 10-24 kg
Head, lifted 45% supine (sec)	(0) 120 seconds
Right leg outstretched- 45-50%, supine (sec)	(1) 31-99 seconds
Left leg outstretched- 45-50%, supine (sec)	(0) 100 seconds
TOTAL	10 14

12.3 QMG Data Fields

Note: the value in () is the score for that option and value in [] is the identifier stored in the database for that option.

13. VISIT - Flexifields

13.1 Description

Centre specified Flexifields for Visits are in this section.

13.2 Rules and Constraints

- Flexifields must be specified in the Preferences.

13.3 Functions

- Enter/Edit Data – You can enter/edit data for flexifields.

FlexiFields

01 - Administrative

02 - Schedule Next Visit

03 - Preferred Time for Next Visit
Mid December 2017

04 - Patient Well-being

05 - Mood of Patient (Self-Assessed)
Good

06 - Mood of Patient (Comments)
Patient is in good spirits.

Save **Cancel**

13.4 Visit Flexfields Data Fields

Ref	Field	Type	Len	Data Format	Nullable	Comments
	FlexField Name [FlexiField.Name]	Field Label		Centres / User-specified		Allowed values will depend on the type of flexfield. Dropdown lists comes from [FlexiFieldOption.Value] These values are not sent through to the Registry

Notes:

- Table PatientVisitFlexiField contains the value that is entered for flexifields from the Visit Flexifields screen in MDS
- Table FlexiField contains the definition of the flexifields, i.e. Name and Data Type
- Table FlexiFieldOption contains the values defined for flexifields where type is a dropdown

14. VISIT - Safety

14.1 Description

The safety page allows the user to report changes in the medical conditions of the patient, such as malignancies, adverse reactions, or events.

14.2 Functions

- Enter/Edit Safety data – You can add/edit the safety data
- View/Add/Delete Medical conditions – You can add/edit the Medical Conditions of the patient.

Safety

Has the patient developed a malignancy (excluding NMSC) since the last visit?

Has the patient developed a non-melanoma skin cancer (NMSC) since their last visit?

Has the patient developed herpes zoster (shingles) since last visit?

Has the patient developed an immunosuppression-associated or severe infection since last visit?

Has the patient developed any other significant medical condition since last visit?

Diseases and Medical conditions + Add new Delete

Conditions	Date Of Diagnosis	Treatment Modality	Outcome	End Date
6 Heart attack	10/11/2016		Death	16/11/2021

14.3 Safety Data Fields

Ref	Field	Type	Len	Data Format	Nullable	Validation/check	Allowed Values	Sent to Registry	Comments

14.06	Disease and Medical conditions	Sub-Report			Yes				Captured in Medical Events, aggregated in this view

15. VISIT - Notes

15.1 Description

Visit specific Notes section where the user can upload documents and refer to URL.

15.2 Rules and Constraints

- Documents are not stored within MDS, they are linked to a drive location.

15.3 Functions

- Enter Data – You can enter notes about the visit.
- Add Link – You can link to a local document.
- Add URL – You can link to WWW resources.

Notes 1

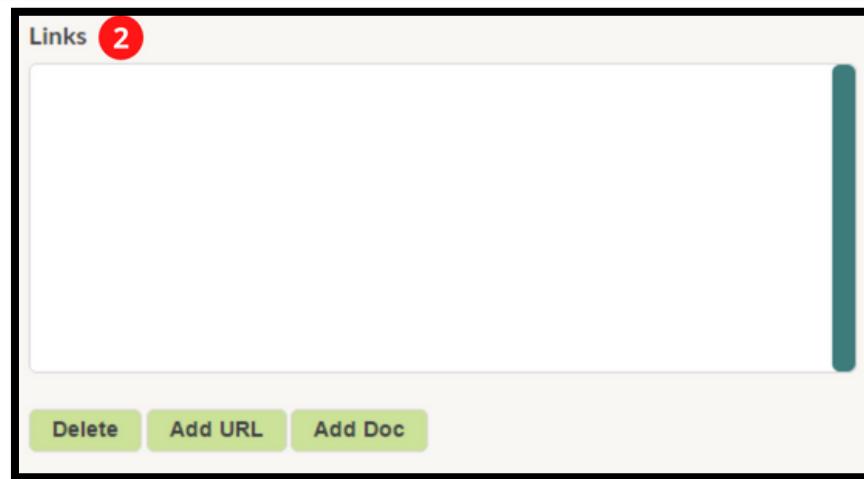

Make booking for next appointment.

16.Exacerbations

The screenshot shows the MGBase software interface for managing exacerbations. The main window title is "Exacerbation". It includes fields for "Onset date" (1) set to 14/10/2014, "Duration" (2) set to 18 Days, and "Symptoms" (3-6) which are checked: Ocular, Bulbar, Respiratory, and Limb weakness. There is also a field for "Diplopia" (7). Below these are fields for "Worst MCC during exacerbation" (8), "Treatment site" (9) set to "Ambulatory", and "ADL impact" (10) set to "Yes". The "Treatment" section (11) lists "Salbutamol" (12) and "IVIG". The "Remarks" section (13) contains the note: "First Exacerbation in a While." A note at the bottom right of the treatment section says: "This patient has a DMT in progress-if you wish to record dose changes please do so via the Treatment menu".

16.1 Description

This section captures the date and details of Exacerbation events.

16.2 Rules and Constraints

- The only medication that can be linked to an exacerbation is typically a corticosteroid. Note, there are symptomatic treatments that have been “classified” in the treatment preferences as Corticosteroids, to be available for selection under exacerbations, even though they are not necessarily Corticosteroids.
- Should a patient have an existing DMT (Disease Modifying Therapy) in progress, this will be flagged in orange text on the exacerbation record. Should the clinician need to change dosage information, this needs to be done via the Treatments menu.

16.3 Functions

- Add/Delete Exacerbation – You can Add/Delete Exacerbation for patient.
- Add/Delete Corticosteroid – You can Add/Delete Corticosteroid (or Variable dosing) schedule.

16.4 Exacerbation Data Fields

Notes:

Treatments module under Exacerbation Section is a sub-report and is the same data captured in the Treatments Table (Refer to Section 36 Disease Specific Treatments)

17. MEDICAL CONDITIONS – Malignancy

17.1 Description

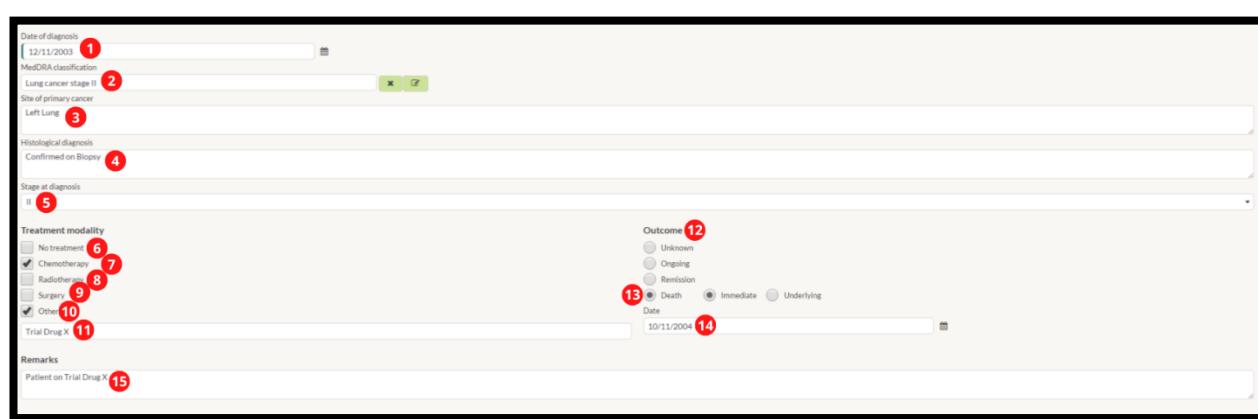

The Malignancy section allows you to record occurrences and details of malignancy.

17.2 Rules and Constraints

- Date of event must be after date of birth and prior to date of death.

17.3 Functions

- Add/Delete Malignancy – You can add/delete malignancy event.
- Add/Edit – You can add/edit details of the malignancy.

The screenshot shows a software interface for managing medical conditions. On the left, there's a sidebar with a tree view. The main area is a form for a 'Malignancy' entry. The form fields include:

- Date of diagnosis: 12/11/2003 (1)
- MeDRA classification: Lung cancer stage II (2)
- Site of primary cancer: Left Lung (3)
- Histological diagnosis: Confirmed on Biopsy (4)
- Stage at diagnosis: II (5)
- Treatment modality:
 - No treatment (6)
 - Chemotherapy (7)
 - Radiotherapy (8)
 - Surgery (9)
 - Other (10)
- Trial Drug X (11)
- Outcome: Death (12)
- Date: 10/11/2004 (13)
- Remarks: Patient on Trial Drug X (15)

17.4 Malignancy Data Fields

Ref	Field	Type	Len	Data Format	Nullable	Validation/check	Allowed Values	Sent to Registry	Comments

18. MEDICAL CONDITIONS - NMSC (Non-Melanoma Skin Cancer)

18.1 Description

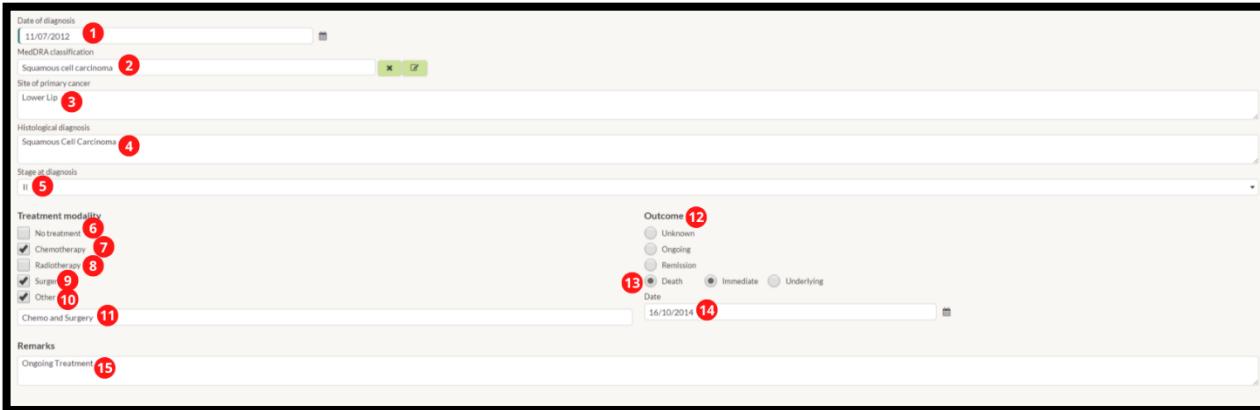

The NMSC section allows the user to record occurrences and details of NMSC.

18.2 Rules and Constraints

- Date of event must be after date of birth and prior to date of death.

18.3 Functions

- Add/Delete NMSC – You can add/delete NMSC event
- Add/Edit – You can add/edit details of the NMSC.

The screenshot shows a data entry form for NMSC. Key fields include:

- Date of diagnosis: 11/07/2012 (1)
- MedDRA classification: Squamous cell carcinoma (2)
- Site of primary cancer: Lower Lip (3)
- Histological diagnosis: Squamous Cell Carcinoma (4)
- Stage at diagnosis: II (5)
- Treatment modality:
 - No treatment (6)
 - Chemotherapy (7) (checked)
 - Radiotherapy (8)
 - Surgery (9) (checked)
 - Other (10) (checked)
 - Chemo and Surgery (11)
- Outcome (12):
 - Unknown
 - Ongoing
 - Remission
 - Death (13) (selected)
 - Immediate
 - Underlying
- Date: 16/10/2014 (14)
- Remarks: Ongoing Treatment (15)

19. MEDICAL CONDITIONS – Herpes Zoster

19.1 Description

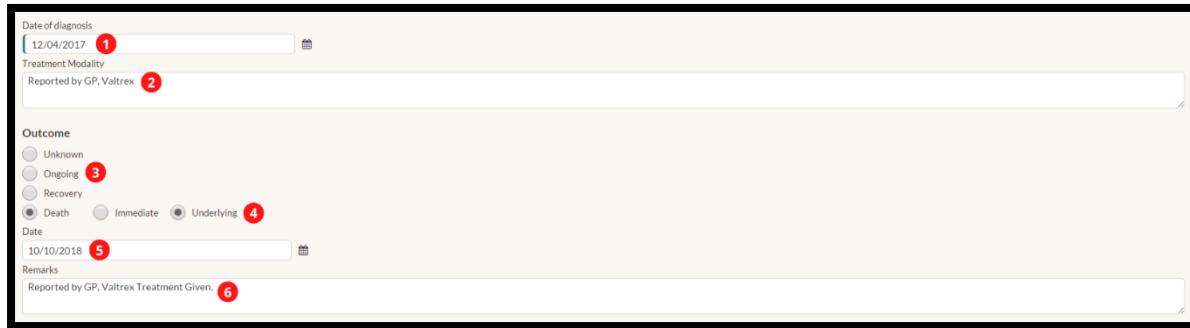

The Herpes Zoster section allows the user to record occurrences and details of Herpes Zoster.

19.2 Rules and Constraints

- Date of event must be after date of birth and prior to date of death.

19.3 Functions

- Add/Delete Herpes Zoster – You can add/delete Herpes Zoster event.
- Add/Edit – You can add/edit details of the Herpes Zoster.

The screenshot shows a data entry form for a medical condition. At the top, there is a date field labeled 'Date of diagnosis' containing '12/04/2017' with a red circled number '1' above it. Below it is a 'Treatment Modality' field with the text 'Reported by GP, Valtrex' and a red circled number '2' above it. Underneath these are sections for 'Outcome' and 'Date'. The 'Outcome' section includes radio buttons for 'Unknown', 'Ongoing' (which has a red circled number '3' above it), 'Recovery', 'Death' (selected, with a red circled number '5' above it), 'Immediate', and 'Underlying' (with a red circled number '4' above it). The 'Date' section contains a date input field with '10/10/2018' and a red circled number '5' above it. At the bottom of the form is a 'Remarks' section with the text 'Reported by GP, Valtrex Treatment Given.' and a red circled number '6' above it.

Medical condition **1**: COVID-19 **2**: 20/11/2020 **3**: Diagnosis Confirmed? Yes No **4**: 10/11/2020 **5**: Was DMT ceased / delayed during this infection? Yes No

Diagnosis Confirmed By
PCR **6**: Positive
Serology **7**: Positive
Typical Chest Imaging Finding **8**: Positive
Other Medical Conditions
Pregnancy **18**: Yes No **19**: Please capture all relevant Pregnancy data in the Pregnancy module
Current Smoker **19**: Yes No **20**: Obesity
Other Medical Conditions? (Comorbidities?)
CVS Incl. Hypertension **22**: Yes No **23**: Diabetes
Chronic Lung Disease **24**: Yes No **25**: Renal Disease
Liver Disease **26**: Yes No **27**: Malignancy
Active In Remission **28**: Lab Tests
Pathology Test Conducted? **29**: Yes No
Has a pathology test been done during this illness?
Lymphocyte Count **30**: 22/12/2020 **31**: 12 **32**: g/dL **33**: White Cell Count **34**: 22/12/2020 **35**: 6 **36**: CD19 B Cell Count **37**: 22/12/2020 **38**: 8 **39**: COVID-19 Severity Indicator
Mild
Moderate **39**
Severe
Life threatening
Hospital Related Incidents
Hospital Admission? **40**: Yes No **41**: Date of Admission **42**: Date of Discharge
ICU Admission? **43**: Yes No **44**: Date of Admission **45**: Date of Discharge
Was Ventilation Required? **46**: Yes No **47**: Invasive Non-Invasive **48**: Was ECMO Required? **49**: Unknown
Ongoing
Recovery **49**
Death
COVID-19 Outcome
Date **50**: 31/12/2020
Remarks **51**: Moderate Covid-19

20.1 Description

- The COVID-19 section allows the user to record occurrences and details of the COVID-19 (SARS-CoV-2) infection.

20.2 Rules and Constraints

- Date of event must be after date of birth and prior to date of death.
- Date of Diagnosis can only be entered once “Diagnosis confirmed?” = “Yes”
- If “Was DMT ceased / delayed during this infection?” = “Yes” the message “Please update the following DMTs in the treatment section” (and will display any active or ongoing DMTs)
- Symptoms can only be selected if “Symptomatic?” = “Yes”
- Comorbidities can only be selected if “Other Medical Conditions?” (Comorbidities) = “Yes”
- Pathology Test Data can only be entered, if “Pathology Test Conducted?” = “Yes”

20.3 Functions

- Add/Delete COVID-19 infection event
- Add/Edit – You can add/edit details of the COVID-19 infection event

20.4 COVID-19 Data Fields

Ref	Field	Type	Len	Data Format	Nullable	Validation/check	Allowed Values	Sent to Registry	Comments
20.01	Medical Condition [Covid19Event.MeddraConditionId] or [Covid19Event.MedicalConditionId] [uniqueidentifier]	Selection Window [bigint]				Mandatory	MedDRA Conditions List	Y	Defaults to COVID-19 MedDRA Condition ID

21. MEDICAL CONDITIONS – Immuno-suppression- associated

21.1 Description

The Immuno-Suppression Associated section allows the user to record occurrences and details of infection.

21.2 Rules and Constraints

- Date of event must be after date of birth and prior to date of death.

21.3 Functions

- Add/Delete Immuno-Suppression Associated – You can add/delete Immuno-Suppression Associated event
- Add/Edit – You can add/edit details of the Immuno-Suppression Associated event.

Date of diagnosis: 11/11/2018 (1)

Additional description: Autoimmune thyroid disease (2)

MedDRA classification: Autoimmune thyroiditis (3)

Treatment modality: Lemtrada (4)

Outcome (5):

- Unknown
- Ongoing
- Recovery
- Death (selected) (6)
- Immediate
- Underlying

Date: 11/11/2018 (7)

Remarks: Autoimmune thyroid disorder may have contributed to death. (8)

21.4 Immuno-suppression-associated Data Fields

Ref	Field	Type	Len	Data Format	Nullable	Validation/check	Allowed Values	Sent to Registry	Comments

22. MEDICAL CONDITIONS – Pregnancy

22.1 Description

The Pregnancy section allows the user to record occurrences and details of pregnancy, outcomes, and breastfeeding.

Beginning of pregnancy
01/06/2021 **1**

Date of diagnosis
08/03/2022 **2**

Date of last menstruation
01/06/2021 **3**

Positive pregnancy test
 Yes **4**

Complications during the pregnancy
Preterm Labour **5**

Birth date
07/01/2022 **6**

Children born from this pregnancy
1 **7**

Total number of children
1 **8**

Delivery
Pre-term **9**

Abnormality reported
Emergency Caesarean **14**

Breast feeding
Yes **15**

Termination/Miscarriage
Miscarriage **10**

Date
17/08/2022 **11**

Stage of pregnancy
36 **12** Weeks

Reason
Preterm Labour **13**

Start date
07/01/2022 **16**

End date
18/08/2022 **17**

22.2 Rules and Constraints

- Pregnancy screen is only enabled and visible if user female

22.3 Functions

Add/Edit / Delete Pregnancy – You can add/edit / delete Pregnancy event.

22.4 Pregnancy Data Fields

Ref	Field	Type	Len	Data Format	Nullable	Validation/check	Allowed Values	Sent to Registry	Comments

23. MEDICAL CONDITIONS - Other Events

23.1 Description

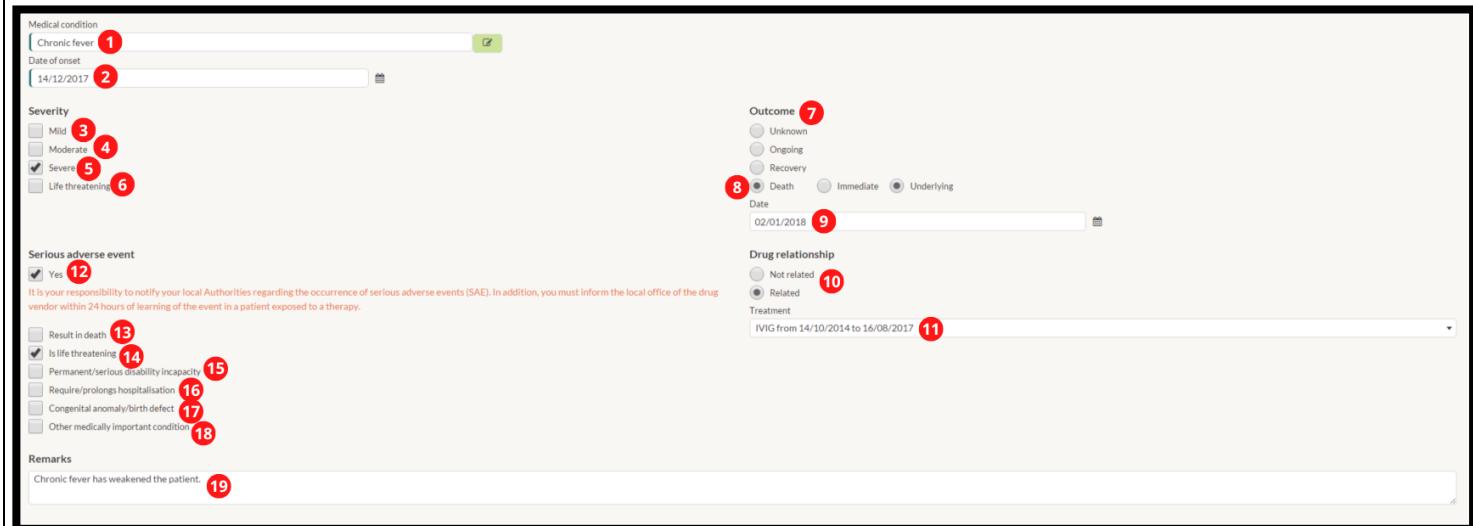

This section captures other medical events.

23.2 Rules and Constraints

- Medical Conditions can be selected from existing MedDRA terms. OR
- Medical Conditions can be selected from the list of reference data terms.
- The start date of the related treatment must occur on or before the date of the adverse condition.

23.3 Functions

- Add/Delete Other Events – You can add/delete Other Events
- Add/Edit – You can add/edit details of the Other Events

The screenshot shows a software interface for entering medical event data. The main sections include:

- Medical condition:** Chronic fever (1), Date of onset (14/12/2017) (2).
- Severity:** Mild (3), Moderate (4), Severe (5) (checked), Life threatening (6).
- Serious adverse event:** Yes (12) (checked). A note states: "It is your responsibility to notify your local Authorities regarding the occurrence of serious adverse events (SAE). In addition, you must inform the local office of the drug vendor within 24 hours of learning of the event in a patient exposed to a therapy." Below this are checkboxes for: Result in death (13), Is life threatening (14) (checked), Permanent/serious disability incapacity (15), Require/prolongs hospitalisation (16), Congenital anomaly/birth defect (17), and Other medically important condition (18).
- Outcome:** Death (8) (selected), Immediate (9), Underlying.
- Drug relationship:** Not related (10), Related.
- Treatment:** IVIG from 14/10/2014 to 16/08/2017 (11).
- Remarks:** Chronic fever has weakened the patient. (19)

23.4 Other Events Data Fields

Notes:

- Table MedicalEventFlexiField contains the value that is entered for flexfields from the Medical Events Flexifields screen in MDS

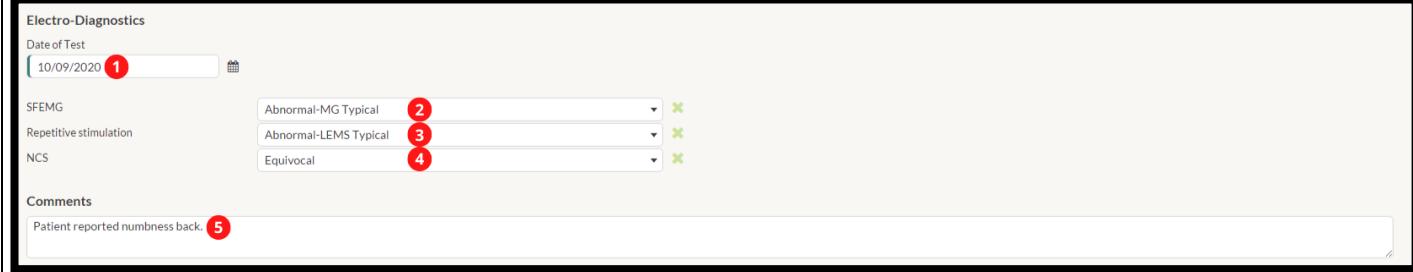

- Table FlexField contains the definition of the flexfields, i.e. Name and Data Type
- Table FlexFieldOptions contains the values defined for flexfields where type is a dropdown
- Type of Medical Condition is stored in Table MedicalEvent, fields Type and Title

25. MEDICAL TESTS – Electro Diagnostics

25.1 Description

- This section provides details on the results of an Electro Diagnostics test.

The screenshot shows the 'Electro-Diagnostics' data entry screen. At the top left is a date input field containing '10/09/2020' with a red circle labeled '1' in the bottom right corner. To the right are three dropdown menus: 'SFEMG' with 'Abnormal-MG Typical' selected (red circle '2'), 'Repetitive stimulation' with 'Abnormal-LEMS Typical' selected (red circle '3'), and 'NCS' with 'Equivocal' selected (red circle '4'). Below these is a 'Comments' text area containing the text 'Patient reported numbness back.' with a red circle labeled '5' in the bottom right corner.

25.2 Rules and Constraints

- Date of test field mandatory

25.3 Functions

- Add/Delete – You can add/delete Electro Diagnostic event details for a patient.

25.4 Electro Diagnostics Data Fields

Ref	Field	Type	Len	Data Format	Nullable	Validation/check	Allowed Values	Sent to Registry	Comments
25.01	Date of Test [ParaclinicalTest.DateOfTest]	Date [datetime]		dd/mm/yyyy	No	Mandatory		Y	Defaults to Today
25.02	SFEMG [ElectroDiagnosticTest.SFEMG]	Dropdown [int]			Yes		Normal[0]; Abnormal-LEMS Typical[1]; Equivocal[2]; Not Tested/Unknown[3]; Abnormal-MG Typical[4]	Y	
25.03	Repetitive stimulation [ElectroDiagnosticTest.RepetitiveStimulation]	Dropdown [int]			Yes		Normal[0]; Abnormal-LEMS Typical[1]; Equivocal[2]; Not Tested/Unknown[3]; Abnormal-MG Typical[4]	Y	
25.04	NCS [ElectroDiagnosticTest.NCS]	Dropdown [int]			Yes		Normal[0]; Abnormal-LEMS Typical[1]; Equivocal[2]; Not Tested/Unknown[3]; Abnormal-MG Typical[4]	Y	
25.05	Comments [ElectroDiagnosticTest.Comments]	Memo [nvarchar]	200		Yes	Length		N	
	[ElectroDiagnosticTest.Id]	Hidden [uniqueidentifier]			No			Y

Notes:

- Type of Medical Test is stored in Table ParaclinicalTest, fields Type and Title

26. MEDICAL TESTS - Imaging

26.1 Description

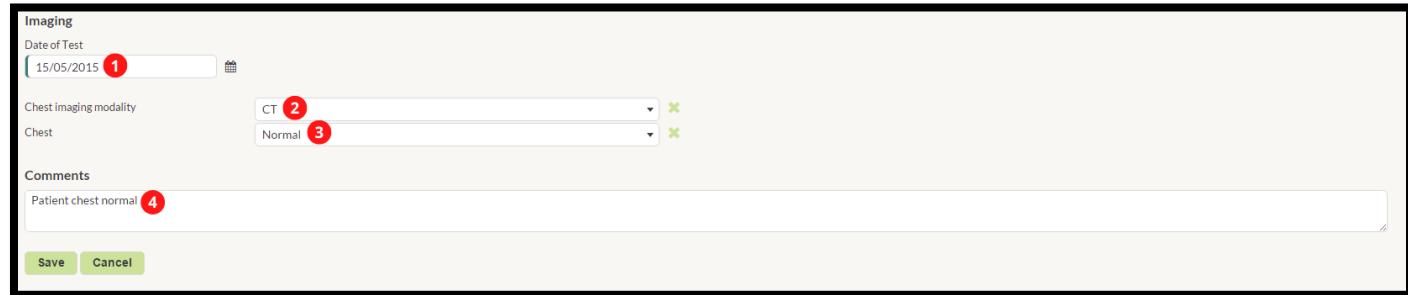

- This section provides details on the results of an imaging test.

26.2 Rules and Constraints

- Date of test field mandatory.

26.3 Functions

- Add/Delete – You can add/delete imaging test details for a patient.

The screenshot shows a software interface for entering medical test results. The form is titled "Imaging". It includes fields for "Date of Test" (containing "15/05/2015" with a red circle containing "1" above it), "Chest imaging modality" (set to "CT" with a red circle containing "2" above it), "Chest" (set to "Normal" with a red circle containing "3" above it), and a "Comments" text area (containing "Patient chest normal" with a red circle containing "4" above it). At the bottom are "Save" and "Cancel" buttons.

26.4 Imaging Test Data Fields

Ref	Field	Type	Len	Data Format	Nullable	Validation/check	Allowed Values	Sent to Registry	Comments
26.01	Date of Test [ParaclinicalTest.DateOfTest]	Date [datetime]		dd/mm/yyyy	No	Mandatory		Y	Defaults to Today
26.02	Chest imaging modality [ImagingTest.ChestImagingModalityId]	Dropdown [uniqueidentifier]			Yes		Lookup Values from table ChestImagingModality CXR; CT; MRI; Other	Y	
26.03	Chest [ImagingTest.ChestImagingResultId]	Dropdown [uniqueidentifier]			Yes		Lookup Values from table ChestImagingResult Normal; Mass -suggestive of thymoma; Thymic enlargement suggestive of hyperplasia; Other significant finding (comment); Not done/unknown	Y	
26.04	Comments [ImagingTest.Comments]	Memo [nvarchar]	200		Yes	Length		N	
	[ImagingTest.Id]	Hidden [uniqueidentifier]			No			Y	
	[FK__ImagingTest__Id__2FEF161B, Relationship 1 to 1 ParaclinicalTest.Id to ImagingTest.Id]	Hidden [Relationship]							
	[FK__ImagingTe__Chest__30E33A54, Relationship 1 to many ChestImagingModality.Id to ImagingTest.ChestImagingModalityId]	Hidden [Relationship]							
	[FK__ImagingTe__Chest__31D75E8D, Relationship 1 to many ChestImagingResult.Id to ImagingTest.ChestImagingResultId]	Hidden [Relationship]							

Notes:

- Type of Medical Test is stored in Table ParaclinicalTest, fields Type and Title

27. MEDICAL TESTS - Bedside

27.1 Description

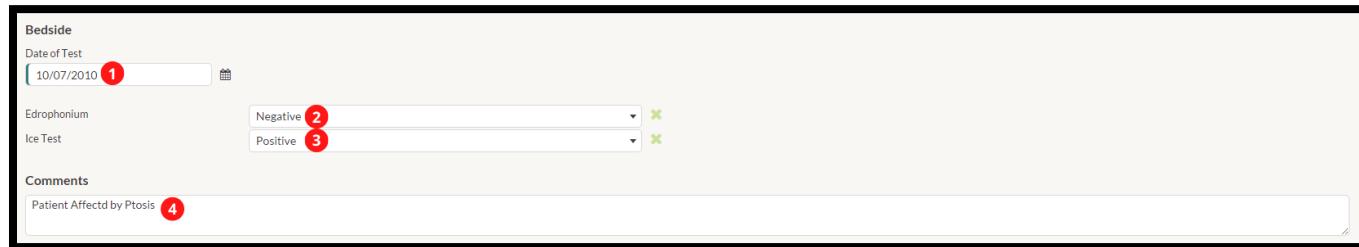

- This section provides details on the results of a bedside test.

27.2 Rules and Constraints

- Date of test field mandatory

27.3 Functions

Add/Delete – You can add/delete bedside test details for a patient.

Bedside

Date of Test
10/07/2010 1

Edrophonium Negative 2

Ice Test Positive 3

Comments
Patient Affected by Ptosis 4

27.4 Bedside Test Data Fields

Ref	Field	Type	Len	Data Format	Nullable	Validation/check	Allowed Values	Sent to Registry	Comments
27.01	Date of Test [ParaclinicalTest.DateOfTest]	Date [datetime]		dd/mm/yyyy	No	Mandatory		Y	Defaults to Today
27.02	Edrophonium [BedsideTest.Edrophonium]	Dropdown [int]			Yes		Positive[0]; Negative[1]; Equivocal[2]; Not Tested / Unknown[3]	Y	
27.03	Ice Test [BedsideTest.IceTest]	Dropdown [int]			Yes		Positive[0]; Negative[1]; Equivocal[2]; Not Tested / Unknown[3]	Y

29. MEDICAL TESTS - Laboratory Tests – Haematology

29.1 Description

The haematology section, part of the broader Laboratory Tests, enables the user to enter data from exams and comment where the test value is abnormal.

29.2 Rules and Constraints

- Date of test field mandatory

29.3 Functions

- Add/Delete Lab test – You can add/delete Lab test details for a patient.
- Add/Delete Lab test Calendar Event – You can add/delete Calendar Event
- Once a Unit has been selected, that same Unit will be pre-filled for future tests of the same type, until the type is changed.

32. MEDICAL TESTS – Laboratory Tests – Microbial Tests

32.1 Description

The Microbial Tests section, part of the broader Laboratory Tests, enables the user to enter data from exams and comment where the test value is abnormal.

32.2 Rules and Constraints

- Date of test field mandatory

32.3 Functions

- Add/Delete Lab test – You can add/delete Lab test details for a patient.
- Add/Delete Lab test Calendar Event – You can add/delete Calendar Event.

Notes:

- Type of Medical Test is stored in Table ParaclinicalTest, fields Type and Title

34. MEDICAL TESTS - Laboratory Tests – Other Tests

34.1 Description

The Others section, part of the broader Laboratory Tests, enables the user to enter data from exams and comment where the test value is abnormal.

34.2 Rules and Constraints

- Date of test field mandatory

34.3 Functions

- Add/Delete Lab test – You can add/delete Lab test details for a patient.
- Add/Delete Lab test Calendar Event – You can add/delete Calendar Event

35. MEDICAL TESTS - Flexifields

35.1 Description

User specified Flexifields for Medical Tests are in this section.

The screenshot shows a software interface titled 'Flexifields'. It includes a date field set to '11/09/2013' and two tables of test results. The left table has three rows: 'Computer Aided Reflex Test' with a score of '75', 'QOL Score' with a score of '78', and a blank row. The right table has three rows: 'Hand-Eye Test' with an overall score of '35' and a seconds value of '25', 'Zig-Zag Walk Test' with a blank overall value and a percent value of '25', and a blank row.

Flexifields	
Date	11/09/2013
Computer Aided Reflex Test	75
QOL Score	78
Hand-Eye Test	35
Zig-Zag Walk Test	25

35.2 Rules and Constraints

- Flexifields must be specified in the Preferences.

35.3 Functions

- Enter/Delete Data – You can enter/delete Flexfield data.

35.4 Medical Test Flexfield Data Fields

Ref	Field	Type	Len	Data Format	Nullable	Validation/check	Allowed Values	Sent to Registry	Comments
	Date [ParaclinicalTest.DateOfTest]	Date [datetime]		dd/mm/yyyy	No	Mandatory	Filtered ≥ Date of Birth and ≤ Today or Date of Death		Defaults to Today
	FlexiField Name [FlexiField.Name]	Field Label						N	
	FlexiField Value [ParaclinicalTestFlexiField.Value]	String [nvarchar]	1000		Yes		Allowed values will depend on the type of flexfield. Dropdown lists comes from [FlexiFieldOption.Value]	N	
	[ParaclinicalTestFlexiField.FieldId]	Hidden [uniqueidentifier]			No			N	
	[ParaclinicalTestFlexiField.Id]	Hidden [uniqueidentifier]			No			N	
	[ParaclinicalTestFlexiField.ParaclinicalTestId]	Hidden [uniqueidentifier]			No			N	
	[ParaclinicalTestFlexiField.CreatedByUserId]	Hidden [uniqueidentifier]			No			N

	[ParaclinicalTestFlexiField.ModifiedByUserId]	Hidden [uniqueidentifier]			No			N	
	[ParaclinicalTestFlexiField.ModifiedUtcDate]	Hidden [datetime]			No			N	
	[ParaclinicalTestFlexiField.RowVersion]	Hidden [bigint]			Yes			N	
	[FlexiFieldParaclinicalTest.Id]	Hidden [uniqueidentifier]			No			N	

Notes:

- Type of Medical Test is stored in Table ParaclinicalTest, fields Type and Title
- Table ParaclinicalTestFlexiField contains the value that is entered for flexifields from the Medical Tests Flexifields screen in MDS
- Table FlexiField contains the definition of the flexifields, i.e. Name and Data Type
- Table FlexiFieldOptions contains the values defined for flexifields where type is a dropdown

36. TREATMENTS - Disease Modifying Treatments

36.1 Description

This section identifies Disease Specific treatments

36.3 Functions

- Add/Remove MG Specific Treatment – User can add treatment, modify data, and delete treatment.

The screenshot shows a software window titled "Disease modifying treatment". Inside, a treatment named "Tecfidera (240mg)" is listed. The "Starting on" field contains "10/09/2010" (marked with a red circle 1). The "Ending on" field contains "10/09/2014" (marked with a red circle 2). The "Dose" field is set to "240" (marked with a red circle 3). The "Unit" field is set to "mg" (marked with a red circle 4). The "Period" field is set to "2/Day" (marked with a red circle 5). The "Route" field is set to "ORAL" (marked with a red circle 6). Below these, a "Reason for discontinuation" field contains "Scheduled Stop" (marked with a red circle 7). At the bottom, a "Remarks" field contains "Good reaction to Tecfidera" (marked with a red circle 8). A small red circle 9 is also present near the remarks field.

36.2 Rules and Constraints

- MG Treatment must be present in the list of MG Specific Treatments. Dose, unit, period may be populated with default values and may be modified.
- Concurrent MG Specific Treatments are possible, but where concurrent treatments are initiated MDS will attempt to close the existing treatment at the start date of the new treatment. MDS will prompt and ask whether you wish to continue the ongoing DMT
- Changing the dosage of an ongoing MG Specific Treatment will be met with a confirmation prompt from MDS. In the instance where it is a valid change (for example an error) then you can ignore the prompt. Where it is a change to dosage, MDS will automatically end the existing treatment and start a new treatment with the new dosage.
- If a Corticosteroid Treatment is selected, there is now an option to create a variable dosing schedule. When Yes is selected, the Add Dose Line button will become visible when the first treatment has an end date and there must be more than 1 dose line entered.
- The start date of the next treatment is always prepopulated with the previous treatment end date + 1 day.
- A zero-dose line is permissible to indicate that the patient is not receiving treatment during the selected period.
- An alert will be displayed if there is a gap in the dosing schedule and will result in a zero-dose line being added after saving.

36.4 Disease Specific Treatment Data Fields

Ref	Field	Type	Len	Data Format	Nullable	Validation/check	Allowed Values	Sent to Registry	Comments
36.01	Disease modifying treatment [DMTreatment.TreatmentTypeid]	Dropdown [uniqueidentifier]			No	Mandatory	Lookup values from table TreatmentType Please refer to the tab for the Table in the Db Schema file to see the selection options (and associated ids) available for this field. List is filtered based on field IsDmt = 1	Y

37. TREATMENTS - Symptomatic

37.1 Description

This section identifies Symptomatic treatments.

37.3 Functions

- Add/Remove Symptomatic Treatment
 - User can add treatment, modify data and delete treatment.

The screenshot shows the MGBase software interface for entering symptomatic treatments. The main window title is "Symptomatic treatment". A dropdown menu shows "Salbutamol" with a circled "1". Below it, a row of input fields includes "Starting on" (06/01/2016, circled "2"), "Ending on" (21/09/2016, circled "3"), "Dose" (125, circled "4"), "Unit" (mcg, circled "5"), "Period" (2/Week, circled "6"), and "Route" (SC, circled "7"). Below these are two text input fields: "Reason for discontinuation" containing "Progression of disease" (circled "8") and "Remarks" containing "Patients Health Declined" (circled "9").

37.2 Rules and Constraints

- Treatment must be present in the list of *Symptomatic Treatments*. Dose, unit, period may be populated with default values and may be modified.
- If a Corticosteroid Treatment is selected, there is now an option to create a variable dosing schedule. When Yes is selected, the Add Dose Line button will become visible when the first treatment has an end date and there must be more than 1 dose line entered.
- The start date of the next treatment is always prepopulated with the previous treatment end date + 1 day.
- A zero-dose line is permissible to indicate that the patient is not receiving treatment during the selected period.
- An alert will be displayed if there is a gap in the dosing schedule and will result in a zero-dose line being added after saving.

38. TREATMENTS - Non-pharmacological

38.1 Description

This section identifies non-pharmacological treatments.

38.2 Rules and Constraints

- Treatment must be present in the list of non-pharmacological treatments.

38.3 Functions

- Add/Remove non-pharmacological Treatment – User can add treatment, modify data, and delete treatment.

The screenshot shows a software interface for managing non-pharmacological treatments. At the top, it says "Non Pharmacological treatment" and "Physiotherapy" (with a red circled '1' next to it). Below that, under "When", it shows "Starting on" (with a red circled '2' next to it) as "10/09/2004" and "Ending on" (with a red circled '3' next to it) as "22/09/2022". Under "Remarks", there is a text box containing the note "Patient has had regular Physio appointments since 2004." (with a red circled '4' next to it).

38.4 Non-pharmacological Data Fields

Ref	Field	Type	Len	Data Format	Nullable	Validation/check	Allowed Values	Sent to Registry	Comments
38.01	Non-pharmacological treatment [NonPharmacologicalTreatment.TreatmentTypeid]	Dropdown [uniqueidentifier]			No	Mandatory	Lookup Values from table NonPharmaTreatment	Y	Note: there is no seed data for the Non-pharmacological treatment list. Each centre will need to add treatments under Preferences > Non-pharmacological treatments.
38.02	Starting on [Treatment.StartDate]	Date [datetime]		dd/mm/yyyy	No	Mandatory	Filtered ≥ Date of Birth and ≤ Today or Date of Death	Y

38. TREATMENTS - Thymectomy

38.1 Description

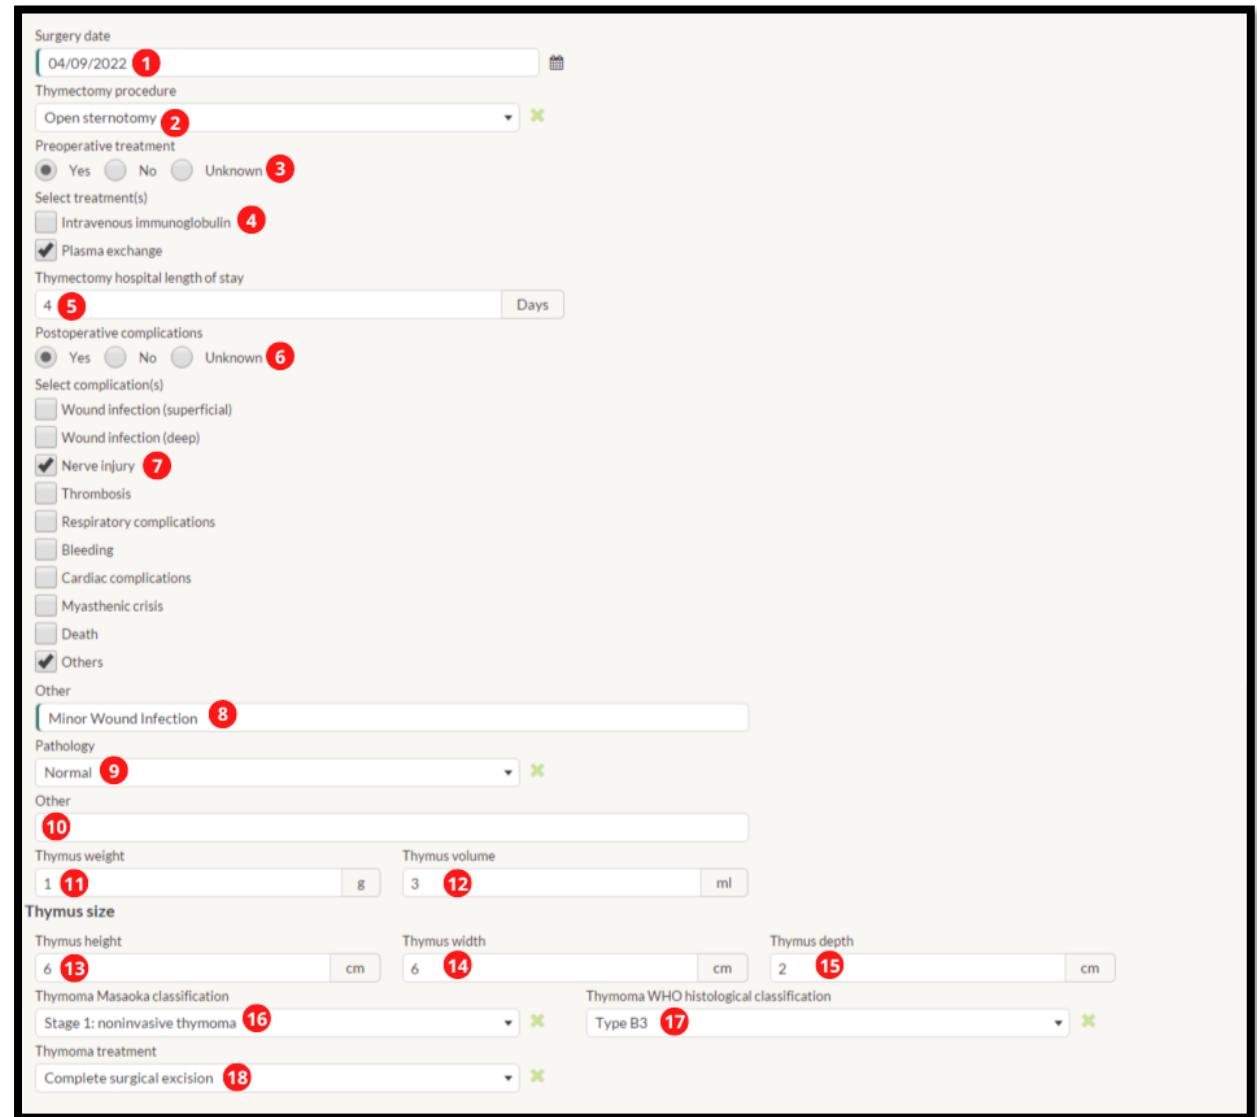

This section identifies thymectomy treatments.

38.2 Rules and Constraints

- Surgery date field is mandatory.

38.3 Functions

- Add/Remove thymectomy Treatment
– User can add treatment, modify data, and delete treatment.

The screenshot shows the MGBase Data-entry Software (MDS) interface for entering Thymectomy treatment data. The form is divided into several sections:

- Surgery date:** 04/09/2022 (1)
- Thymectomy procedure:** Open sternotomy (2)
- Preoperative treatment:** Yes (radio button) (3)
- Select treatment(s):** Intravenous immunoglobulin (4)
- Thymectomy hospital length of stay:** 4 (5) Days
- Postoperative complications:** Yes (radio button) (6)
- Select complication(s):**
 - Wound infection (superficial)
 - Wound infection (deep)
 - Nerve injury (7) (checked)
 - Thrombosis
 - Respiratory complications
 - Bleeding
 - Cardiac complications
 - Myasthenic crisis
 - Death
 - Others (checked)
- Other:** Minor Wound Infection (8)
- Pathology:** Normal (9)
- Other:** (10)
- Thymus weight:** 1 (11) g
- Thymus volume:** 3 (12) ml
- Thymus size:**

Thymus height: 6 (13) cm	Thymus width: 6 (14) cm	Thymus depth: 2 (15) cm
--------------------------	-------------------------	-------------------------
- Thymoma Masaoka classification:** Stage 1: noninvasive thymoma (16)
- Thymoma WHO histological classification:** Type B3 (17)
- Thymoma treatment:** Complete surgical excision (18)
