

MSBase Foundation Ltd

Our Mission:

To provide a global governance framework, database tools, and research support to enable worldwide collaborative outcomes and epidemiologic research for the benefit of people with multiple sclerosis and other neuro-immunological diseases.

Our Vision:

To be the global leader in supporting collaborative, real-world, quality research in multiple sclerosis and other neuro-immunological diseases.

Our Values:

The following values drive the organisation's culture and provide a framework for decisions.

Respect

- We value the contribution of all centre physicians and care teams.
- We value the involvement and respect the rights of patients.
- We foster an inclusive and welcoming workplace and research platform through respect and empathy for each other.

Collaboration

- We facilitate collaborative research projects.
- We continually explore opportunities to collaborate with the broader scientific community.
- We encourage and support investigator-initiated research.
- We provide an opportunity for physicians to contribute to the scientific leadership of the organisation.
- We listen, learn and share information and work as a team to achieve success.

Accountability

- We seek permission and consult our investigators about the use of data in global studies and provide them with all findings and reports.
- We are transparent in our research and business activities.
- We respect the confidentiality of patient data and require our investigators to follow all applicable local research ethical requirements.
- We take ownership of our work, contributions, decisions, and actions, ensuring trust and confidence.

Quality

- We strive to conduct meaningful research and disseminate our findings widely.
- We are proactive in recognising new and emerging research opportunities and needs.
- We aim to create evidence for better disease management.
- We strive to constantly improve the scope and methodology of our data collection.
